

How are your Nurses spending their Time?

Time Study RN™ is the Solution to understanding how Nurses spend their Time.

Designed specifically for Healthcare, Time Study RN™ is the Easiest, most Comprehensive Solution for Healthcare Work Measurement.

Major Benefits Include:

- Accuracy: Eliminate data entry and accurately record data.
- Work Sampling: Understand and optimize your resources.
- Random Studies: Set a random alarm for data entry.
- Self Sampling: Data collection performed by Nurses.

Pre-Defined Work Categories & Operational Definitions

Time Study RN™ comes with 78 categories that have been field tested at over 60 hospitals across North America.

Time Study RN™ saves you Time & Money

Collecting data on a handheld computer with Time Study RN™ is **up to 85% faster than using a stopwatch**. Data collection is done by the Nurses freeing up the Analyst or Performance Engineer to do more problem solving. Furthermore, by eliminating the step of manual data entry, you minimize the risk of potential error.

Create your Study - your Way

Whether it is self sampling or more traditional work measurement studies, Time Study RN™ is developed to be a **flexible program** that allows you to easily customize each study to suit your needs.

You Find your Solutions Faster

Doing work measurement studies with Time Study RN™ grants you **instant access to reports** that will help you to quickly determine where and how to implement your solutions.

System Requirements

- Windows® 95 / 98 / 2000 / NT 4 / XP
- Palm OS® 3.0 or higher
- Serial Cradle with any kind of Handheld
- USB Cradle only with Palm™, Handspring™ or Sony CLIE™ Handheld
- Note: Windows® 95 and NT do not support USB.
